To work in a professional and challenging environment in which I can expand my areas of expertise and achieve goals for a company that focuses on customer satisfaction and customer experience.

Work History

Software Developer

Developing applications with Laravel framework and Node Js as back-end Technology.
Developing applications with vue.js and HTML,css and JQuery as front-end Technology.

ManekTech., Ahmedabad, Gujarat

Work Experience: Currently working here since last 1 Year

Coitok is a project in which we make some dynamic data for the cryptocurrency project and then replace that dynamic data with the already created files of their cryptocurrency project(coitok).

To Make this admin panel we use Laravue package and Laravue is an administrative interface for Laravel built by VueJS and Element UI and for role permission we use spatie package.

We also made APIs in Node.js with mongodb database for the front panel of this project and integrated these APIs with vue.js and made the front panel of this project.

Strommen-Learning is a learning website in which tutors add their courses and students can subscribe to the courses of those tutors.

We use Laravel as the back-end technology with MYSQL Database.And for front End we use HTML 5, CSS 3, JQuery and Bootstraps.We use S3 bucket of AWS for image storage.

Digital Trons Techno LLP., Ahmedabad, Gujarat

Work Experience: 1 Year

Life TRNDS is a multi-level marketing (also called network marketing or pyramid selling) project that provides a platform for booking hotels, cabs, restaurants and booking tickets for movies and sports.

Node

Good

MongoDB

Good

AWS Console (EC2 instance
and RDS instance)

Good

For this project we used authorized.net payment gateway
We use Laravel as the back-end technology with MYSQL Database.
And for front End we use HTML 5, CSS 3, JQuery and Bootstraps.
To provide booking of hotels and all kind of stuff we generate JWT through **Node** Api with MYSQL Database
Previously they wanted to convert this project into Node Js from Laravel so I Made some of the APIs of this project into Node like Get user profile, Update user profile, forgot password and login of user.
For Deployment Purpose we use AWS server so I worked on EC2 instance, RDS instance for Database and S3 bucket for storage purpose.

***Webs Optimization Software Solutions.,
Ahmedabad, Gujarat***

Work Experience: 1 Year

Rebate labs project is about paying rebate to the Amazon customer through third party packages like click funnel, we use spatie role permission package also to give permission to user as well as admin; we use Laravel as the back-end technology.
And for front End we use HTML 5 and CSS 3 and Bootstraps.
