ABOUT ME

Hi, professionally I'm a Graphics Designer. I'm optimistic that the prior experience in the field of designing will help you to design rich content and will fulfil the Client's need. Being in the corporate sector, it is most important to have the ethics and specific process in order to complete the task and I'm well aware and being praised for the same. I get easily blend with the changes that organization brings to the table for the development. Looking forward to join an organization where I can utilize and enhance my skills for a career growth.

2018 - 2019 | PCB POWER MARKET PVT.LTD

Appointed as a Customer Sales Support Advisor.

General Contracting

A general contractor is responsible for managing the construction process, from start to finish. They are responsible for obtaining permits, managing subcontractors, and ensuring the project is completed on time and within budget.

Building Modeling

Building modeling is the process of creating a digital representation of a building. This can be used for visualization, analysis, and documentation. It can also be used to simulate the building's performance, such as energy efficiency and structural integrity.

Design Build

Design build is a project delivery method in which a single entity, the design-build team, is responsible for both the design and construction of a project. This approach can lead to faster project completion and better cost control.

Construction Services

Construction services are the various tasks and activities involved in the construction process. These can include site preparation, foundation work, framing, roofing, and finishing. Construction services can be provided by a general contractor or a specialized subcontractor.

Pre-Construction Services

Pre-construction services are the tasks and activities that occur before the construction of a building begins. These can include site assessment, permit acquisition, and procurement. Pre-construction services are essential for ensuring a smooth and successful construction process.

Construction Management

Construction management is the process of planning, organizing, and controlling the construction process. This involves managing the project schedule, budget, and quality. Construction management is essential for ensuring that a project is completed on time and within budget.

7 YEARS

From 2012, groups of people are being encouraged to be more active in their communities. This is a good thing, but it is also a challenge. It is not always easy to find the time and energy to get involved. However, there are many ways to do this. For example, you can join a local club or organization. You can also volunteer your time to help out in your community. This is a great way to meet new people and make a difference in your neighborhood.
