PROJECTS

Dundee Recovery Road Map (07/2021 - 11/2021)
- This system is specially made for dundee city. In this system admin can add business which is located in this city and also add related events which is going to happen in dundee city .Their are 2 user of this system system admin and user.
- My Role :- My role in this app is to set up the complete backend. Add features as per clients requirements and tickets provided on jira and handle deployment on heroku. I had made API's For Admin side as well as user Side.
- Technologies Used :- React JS , Node JS , React Native.

SmartFinDoc (01/2022 - Present)
- This system is company's own product which is mainly based on document management for CA and associates. There are 4 Types of user's System admin, Admin (CA) , Staff (Staff of CA) , User (CA's client). System admin can manage ca and provide cloud storage on AWS s3 for upload document. CA can manage staff and its client.
- My Role:- My role in this app is to manage complete backend and also API integration using react. Add features as per requirement and handle deployment of backend and frontend on AWS.managemnt aws cloud storage and aws services.Currently, I am working on frontend(React JS) and backend(Node JS) both as per requirement.
- Technologies Used :- React JS , Node JS, React Native.
