<div align="center">**Project Summary:**</div>

Gilly - (React/Node)

- Gilly lets targeted audiences create & share short videos with their stakeholders. It's used for politician for US country.

- In this project we manage development via **GIT with proxy server**. We used **Video cam** for video records and managing with short time.

- Manage server side work on **GCP**.

SocialBubble - (Laravel/Android/IOS)

- Create bubbles for all your interests, family, and friends. The number of bubbles you want to create is only limited by your own imagination.

- We used reaction for messages and for chat we used **MQTT protocol**.

- Manage server side work on **AWS**.

There are many other project under my team like ecommerce garagelane, letsbiz, for Doctor app Mouthview, Orrca, for **third party app Video SDK** project. I have also block chain team and for them I am managing several projects like **solona token**, Bitcoin hedge token, NFT traders, NFT creation, **NFT market**.

EDUCATION

<div align="center">**BE in Computer Science** / KIT, Jamnagar</div>
